DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang (US 2003/0078036).

As to claim 1, Chang discloses a cellular phone terminal 200 (see figure 1; paragraph [0020]), comprising: a visible light receiver and a visible light emitter provided side by side and oriented in the same direction (see laser interface 11 which provides two-way communication with station 100; therefore, the laser interface would inherently include a visible light receiver and a visible light emitter. In addition, since the visible light receiver and visible light emitter are both included in a same interface 11, they are provided side by side and oriented in the same direction); capable of performing visible light communication (see laser interface 11 at paragraph [0019]).

As to claim 2, the claim fails to further define how a visible light directivity is called a "strong directivity". Accordingly, the visible light directivity in Chang reads on a "strong directivity" as claimed with the broadest reasonable interpretation.
